Mr. John Haigis
1006 Main Street
Darby, PA 19023

Dear Mr. Haigis:

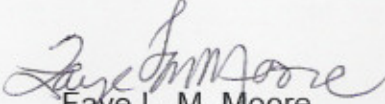

Thank you for your letter regarding the re-establishment of Route 13 trolley service over SEPTA's private right-of-way connecting Yeadon to the Darby Transportation Center.

In 2001, the Delaware County Planning Commission requested an estimate of the cost involved to make necessary repairs to the track and infrastructure in order to provide round trip service to Darby on Route 13. The estimate at that time was approximately \$150,000, which was provided to the County. Since that time, the repair cost has probably increased due to further deterioration.

At the present time, this project is not programmed in SEPTA's Capital Budget, and Delaware County has not indicated an interest to pursue it. Other options which would provide similar routing feasibility are being explored, but would also be contingent upon the availability of capital funding.

Thank you for your interest in this matter.

Sincerely,

Faye L. M. Moore
General Manager
